DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because it claims both an apparatus and the method of using the apparatus. The metes and bounds of the claim are not ascertainable. Claims 2-7 are indefinite by virtue of their dependence from claim 1 and do not remedy the indefiniteness of claim 1.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to neither a “process” or a “machine”, but rather overlap both statutory classes. See MPEP 2173.05(p).

Claims 1-7 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. The instant invention is directed toward a perpetual motion machine in that it seeks to create energy.

Art Unit: 3745

The invention seeks to provide torque to a shaft by way of a pressure difference between atmospheric pressure and a vacuum pressure created within a closed chamber occupied mainly by a liquid. The invention is a perpetual motion machine because it violates the law of conservation of energy in that it seeks to produce power without any energy input into the system.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 3412482, 3625089, 3934964, 4385497, 5996344, and 6764275 each disclose a power generating apparatus.
